

JULIANA NDUNGE

Software Quality Assurance Engineer

 juliana.ndunge.qa@gmail.com |  +254718453328 |  LinkedIn |  Portfolio

Professional Summary

I've completed my Bachelor of Science in Mathematics and Computer Science and expect to graduate this December. Over the past few months, I've been training with PLP Academy, where I tested real-world applications using Selenium, Postman, and Python. Through this experience, I've developed a strong understanding of test design, automation, and software reliability. I see Quality Assurance as the bridge between good software and great user experiences, and I'm eager to deepen my skills in testing, DevOps, and system quality within a professional environment.

Projects /Experiences

Test Lead – CleanCity Waste Pickup Scheduler (PLP Academy Final Project)

Jun– Jul 2025

- Led QA for a waste management app, covering login, registration, dashboard, and admin features.
- Designed and executed 16+ test cases; logged defects in Jira and delivered full QA documentation.
- Performed functional, integration, end-to-end, and performance testing using Selenium, k6, and Lighthouse.

Data Visualization Dashboard – QA & API Testing

4th Aug - 8th Aug 2025

- Validated API integrations and chart accuracy.
- Conducted performance benchmarking with Lighthouse and k6.

Skills

Testing & Quality Assurance:

- Manual & Automated Testing | Test Case Design & Execution | Defect Logging (Jira, GitHub)

Tools & Frameworks:

- Selenium | Postman | Lighthouse

Programming & Scripting:

- Python | Java | JavaScript | HTML | CSS | SQL (MySQL, Oracle basics)

Data & System Reliability:

- Data Analysis | API Testing | System Monitoring | Performance Testing

Version Control & CI/CD:

- Git | GitHub Actions | Jenkins

Education

Bachelor of Science in Mathematics & Computer Science

Kenyatta University

Sep 2021 - Dec 2025

Certification

Certificate in Software Testing

Power Learn Project (PLP) Academy

Feb 2025 - Nov 2025
